REFERRED BY DR. _____

PLEASE CHECK THE APPROPRIATE BOXES:

- Has current panoramic X-Ray
- Periodontal concerns
- Restorative needs before treatment
- Medical conditions

Comments: _____

EXAMS FOR CHILDREN:

Orthodontic exams, starting at age 7, are important for catching bite and jaw concerns early and to prevent more aggressive treatment later.

Treatment is not always recommended at this time. We will start monitoring your child's growth and create a treatment plan unique to your child's needs because greater smiles come in all styles!

TREATMENT OPTIONS:

We offer a variety of treatment options. Traditional braces, ceramic braces, or Invisalign clear aligners can help you achieve the perfect smile and a healthier bite.
